

No devices shown even though there are rows available

The screenshot shows a monitoring console interface with a top navigation bar containing tabs for console, graphs, thold, discover, monitor, nectar, mactrack, reports, manage, and weathermap. Below the navigation bar, the breadcrumb path is 'Console -> Devices'. On the left, there is a sidebar menu with options like 'Create', 'New Graphs', 'Management', 'Graph Management', 'Graph Trees', 'Data Sources', 'Devices', 'Report Configurations', 'Weathermaps', 'Thresholds', 'Device Managing', 'Event Reporting', 'Groups', 'Sites', 'Device Tracking', 'Sites', 'Devices', 'SNMP Options', and 'Device Types'. The main content area is titled 'Devices' and includes a search filter with 'Type: Any', 'Status: Any', and a search input field. It also shows 'Rows per Page: 30' and 'Go' and 'Clear' buttons. Below the search filters, there is a table header with columns: 'Description\*\*', 'ID', 'Graphs', 'Data Sources', 'Status', 'Event Count', 'Hostname', and 'Current (ms)'. The table content shows 'Showing Rows 1 to 30 of 1250 [1,2,3,4,5,6,7,8,9,10,11,12,13,14,15,16,17,18,19,20,21...]' and a message 'No Hosts' with a mouse cursor pointing to it.

Graphing problem. Some graphs do show up but have no data in them.

The screenshot shows a monitoring console interface displaying a grid of 10 empty graph panels. The top of the grid shows 'Showing Rows 1 to 10 of 10700'. Each panel contains a search input field and a set of icons (a magnifying glass, a question mark, a hand, and a red circle with a white 'X') for interacting with the graph. The panels are arranged in a 2x5 grid.
